### EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 6, and 11 are allowable because the prior art of record does not disclose or reasonably suggest the limitations of reading a map file by traversing a legacy file column by column, mapping all of the text in a column to a markup language file, traversing nodes of a tree structure node-by-node, and retrieving all of the text from one of the columns of the legacy file when a reference in an attribute file matches a heading of one of the columns of the legacy file. Applicant's arguments in the Pre-Appeal Brief Request are persuasive insofar as *Ballantyne et al.* fails to meet all the limitations of mapping a legacy file into a markup language file by traversing column by column, and mapping all of the text in a column to the markup language file by traversing nodes of a tree structure node-by-node. Generally, *Ballantyne et al.* discloses a tree structure for mapping text from a legacy file to a markup language file, and illustrates a tree structure of data in Figure 7. However, *Ballantyne et al.* cannot be reasonably construed to suggest a procedure where the tree structure is traversed node-by-node, a legacy file is traversed column by column, and mapping all of the text in a column to a markup language file.

The rejection of claim 18, as failing to comply with the written description requirement of 35 U.S.C. §112, 1<sup>st</sup> ¶, is reconsidered. It is concluded that Applicant's Specification, Page 8, Lines 6 to 9, contains sufficient disclosure to support limitations

directed to a parser that can operate upon elements that are nested and have multiple occurrences in a markup language file.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
